New Giant Midseason Berry

Illustrated in Color on Front Cover

**HAS PRODUCED 32,000 QUARTS FROM
3 ACRES—SOLD FOR \$3500.00**

At last we are able to offer an outstanding and highly profitable mid-season Strawberry.

This variety was introduced a few years ago by the New York Experiment Station. Catskill is a cross between Marshall and Premier and like Premier can be successfully grown in all sections of the country. Does well on any kind of soil—we have fruited Catskill this year and were pleasantly surprised by the size, beauty and quantities of berries produced this **extremely dry season**.

Catskill is self-pollenizing, the berries are dazzling bright red, like Premier, size like Fairfax or larger, on strong fruit-stems, and hold their size to the last. In 1935 a 3-acre lot produced 32,000 quarts of berries. The plants are large and sturdy, producing strong runners, the leaves are extra large, a free plant maker. On our farms they are grown on new land, and are very thrifty, with an extra large heavy root system.

Prolong your fruiting season by two weeks, get top prices, when earlier varieties are on the decline.

The supply of plants is limited, if you are interested it is advisable to order as early as possible and have your plants reserved.

YOU ARE SAFE

By intrusting your order to us. Many thousands of our satisfied customers have testified to that. They have approved our

way of doing business by ordering their nursery supplies from us year after year, they are the backbone of our ever growing business.

WE HAVE SUCCEEDED DURING THE 1936 GROWING SEASON

In SPITE of the terrible drought and have produced a healthy lot of extra heavy rooted, quality plants for our 1937 trade. Our good fortune during the unusually dry weather was not merely an accident. It was due to the careful selecting of the strongest plants of the best varieties planted, to our "years ahead plan" of preparing the soil—and to expert care after planting.

HARDY NORTHERN GROWN

OUR NORTHERN CLIMATE is ideal for growing hardy nursery stock, because we are located so near Lake Michigan, which puts a damper on our winters, making the climate such that our nursery stock is practically dormant until late in the spring. Bear in mind, Mr. Fruit Grower, plants that are dormant so late in the season have little foliage and carry well in transit. That is one reason why our plants can be shipped long distances with the best of results.

ORDER EARLY—PLANT SHORTAGE

An unusual plant shortage exists in nearly every state, due to the continued drought last summer. Reliable sources report the Everbearing Strawberry plant crop at 30%, spring Strawberry plant crop at 50%. Protect yourself, order early and have your plants reserved.

REFERENCES:

Dun and Bradstreet; Benton Harbor State Bank, Benton Harbor, Mich.; Postmaster and Railway Express Agent, Sawyer, Mich.

Strawberries the Most Profitable Farm Crop

Here in our Michigan Fruit Belt our commercial growers received for the better varieties from \$800.00 to \$1,000.00 per acre for their berry crop last spring, in fact a high price prevailed in all sections of the country. The outlook is very encouraging for years to come—the acreage being limited, the stand below normal in almost every state, plants being higher in price for 1937 planting and not enough to go around for the 1938 berry crop.

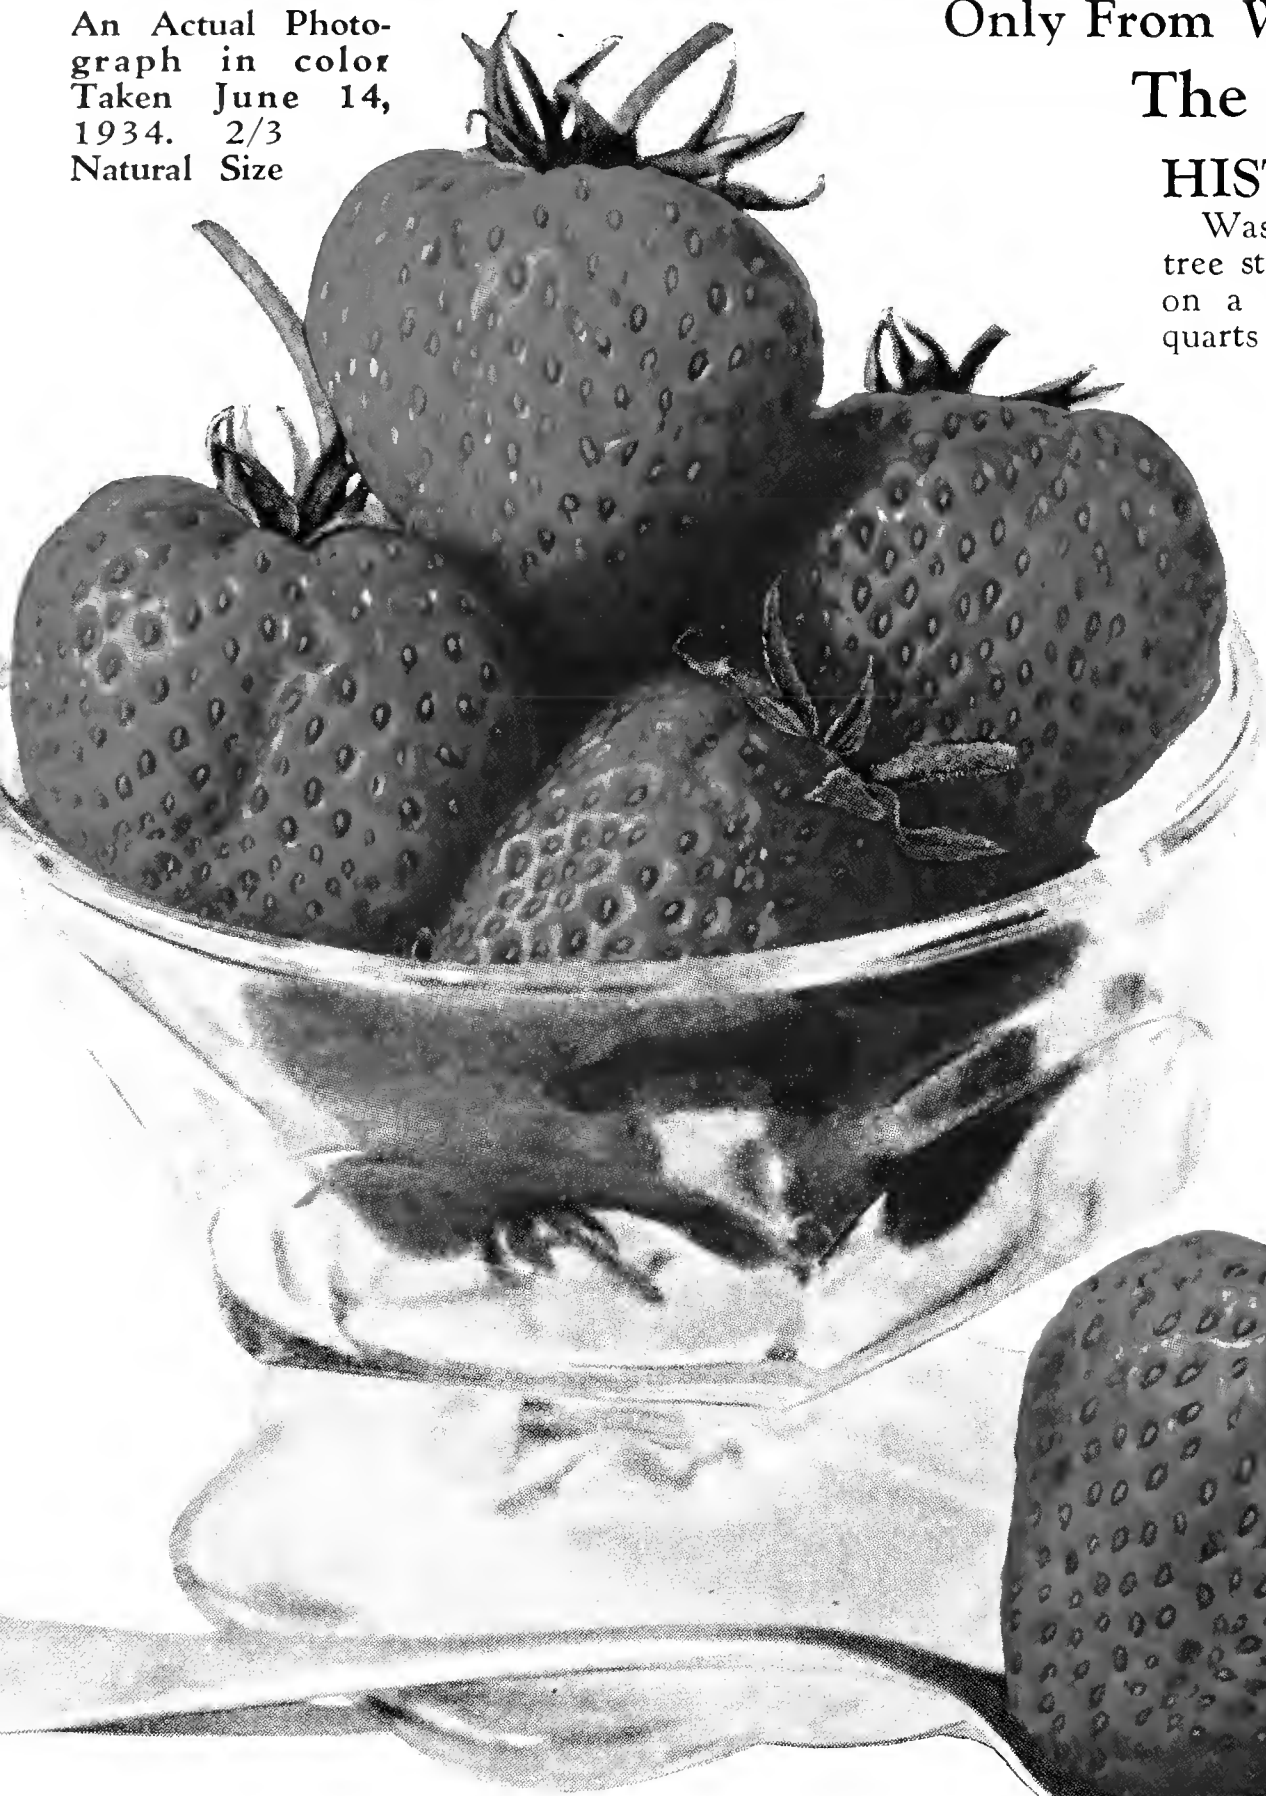

Taking all this into consideration, the outlook is very bright and points to prosperity for the berry grower.

The ORIGINAL Strain

HISTORY of Grand Champion

Was found as a single seedling on a decaying tree stump, produced 30 plants, which were set out on a space of 66 square feet, we harvested 105 quarts of Berries of this setting the next spring.

Over 5000 Quarts on One-Half Acre

Two years later in spite of heavy frost while they were in bloom, and almost continuous rain during the harvest, we picked over 5000 quarts of berries from one-half acre. The tall heavy foliage protects the blooms from late spring freezing, and then too they bloom over a long period, ripening a few days after Premier; bear during the entire spring Strawberry season and still compete in quality with Aroma, which is a late variety. We have picked berries over a period of over 40 days.

What Our Customers Say About Grand Champion

Wisconsin.
"I want to write you about my Strawberry plants which I purchased from you last year. I was pleased with the Grand Champion—had a wonderful crop of excellent quality. I set several varieties which were good, but nothing compared to Grand Champion."
Yours truly,

ALVIN NITZ

Westhauser's Nurseries

Ohio.

Gentlemen: Last spring I bought 2000 Grand Champion Strawberry plants from you and I want to tell you what fine success I had with these plants.

Grand Champion beats them all for **size, appearance, and fine quality.** I grow only the better kind of Strawberry. My customers paid me a premium on Grand Champion and I always was sold out of them first. Not only are they larger than any other variety, but there were twice as many of them and picking was a pleasure and most profitable.

FAR VIEW FRUIT FARM.

Berries

See ACTUAL COLOR PHOTO ABOVE. (1/3 reduced from natural size). For canning and preserving they are in a class by themselves. Their rich, red color, extra large size and beautiful appearance attract the fancy berry buyer.

Customer Buys 2000 Plants in 1934 Orders 30,000 in 1936

We have an old customer who orders large quantities from us yearly. In 1934 he ordered 2000 Grand Champion plants together with other standard varieties; this year he reduced the quantities of other varieties and increased his requirements to 30,000 Grand Champion. This speaks for itself. This year we have only one-half of our usual supply. Protect yourself and get your order in early.

Westhauser's **WAYZATA** **EVERBEARER**

FLAVOR. Without contradiction it is the best flavored Everbearer grown (Delicious Honey-Sweet). Prospective customers who have visited our fruiting fields and have sampled the Wayzata have invariably selected this variety for their planting, in spite of the price being much higher than other Everbearers.

FOLIAGE. The foliage is dark green, stands 8 to 10 inches high. The crowns often multiply 10-fold or more, which accounts for their heavy fruiting quality. However, since they are so busy directing their energy to fruiting, they do not make as many new plants as other Everbearers. This is the reason that plants will be scarce for some time to come. (This, together with the demand, makes the price high). The demand is very active. Last year we returned lots of orders with money enclosed. Be wise, order early and have your plants reserved.

A FIELD OF WESTHAUSER'S WAYZATA OWNED BY MR. FORBES OF CALIFORNIA

Westhauser Nurseries, Sawyer, Mich.

Gentlemen: The 5000 Wayzata Strawberry plants which I received from you this spring were as fine as could be grown anywhere. The quality of the berries is unsurpassed; they are sweet, have a very pronounced flavor and aroma, and are firmer than most everbearers. They are very attractive and ripen uniformly. Enclosed is a photo showing them 90 days after planting, when they were fruiting heavily. You can look for a fine order next January.

Respectfully,

A. K. FORBES.

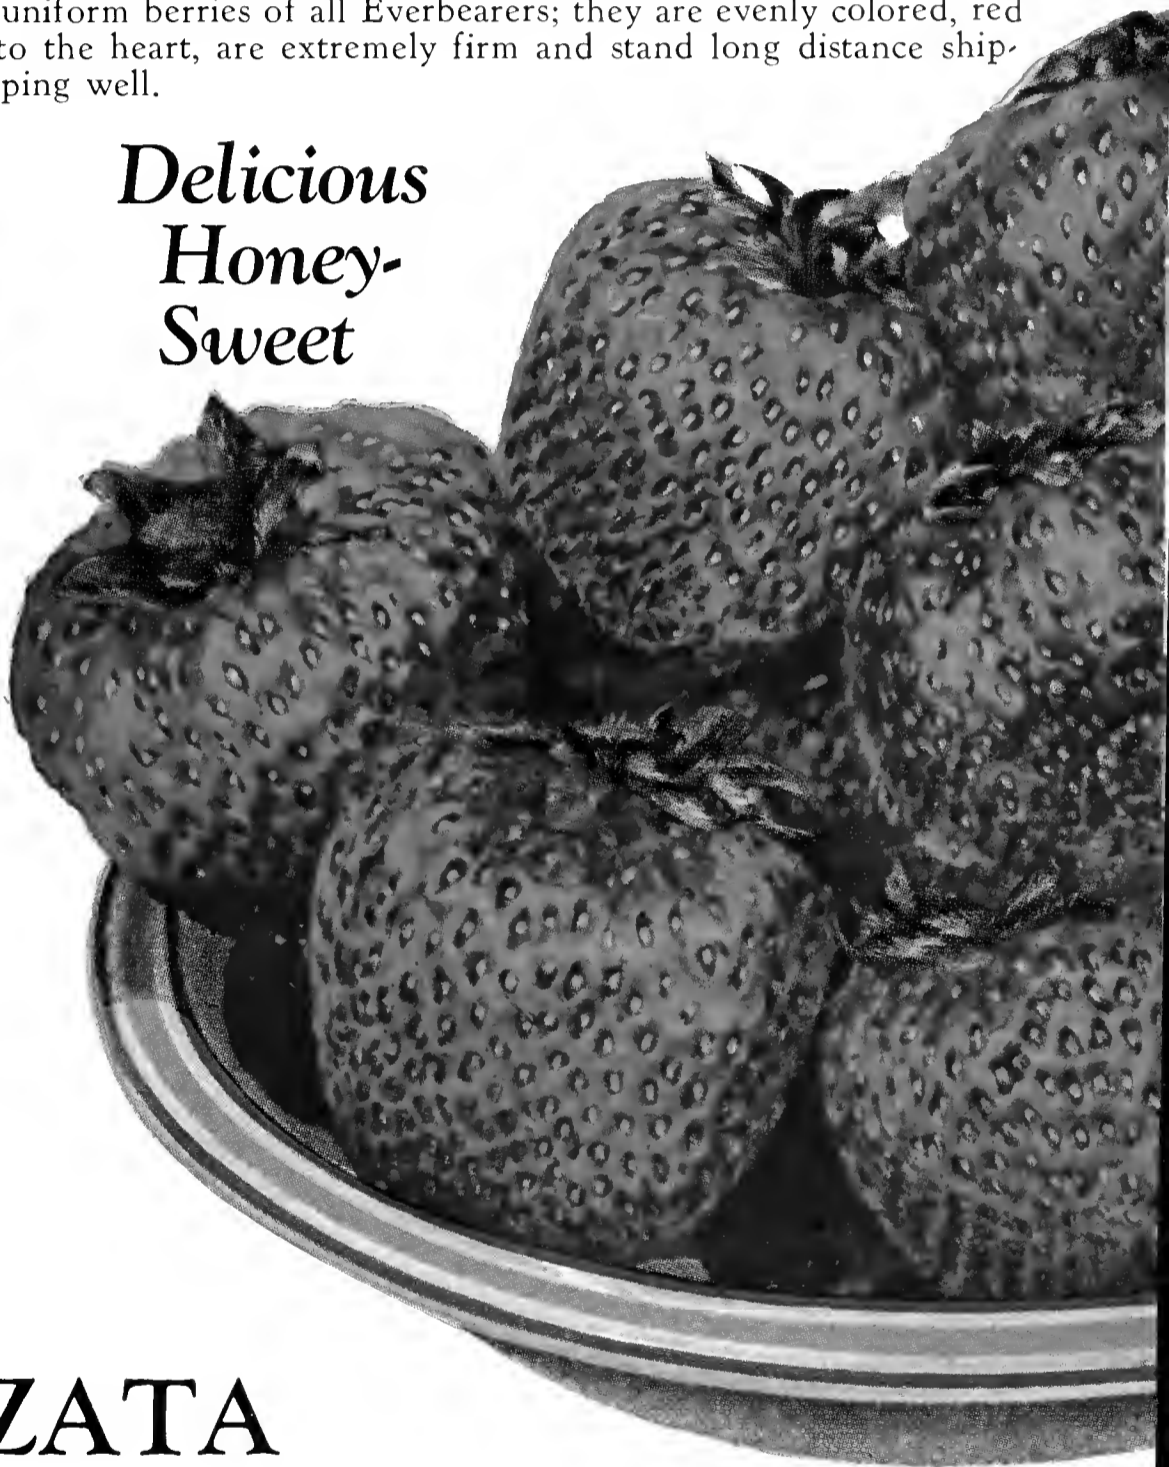

A Single Clump or
Combination Plant

DELICIOUS HONEY SWEET—New land grown. Our foundation stock was bought from the originator. We have further improved this variety by growing them on our fertile new land.

We have fruited Wayzata the second year in this very dry summer and they have outyielded other Everbearers 3 to 1. At this writing, October 22nd, there are still lots of berries and blooms on the vines and the harvest will continue until snow flies. The originator claims that he picked from June to fall, 1932, 901 cases from 3½ acres which sold for \$3,100.55.

BERRIES. The Wayzata produces the largest and most uniform berries of all Everbearers; they are evenly colored, red to the heart, are extremely firm and stand long distance shipping well.

*Delicious
Honey-
Sweet*

WAYZATA

Clump or Combination Plants

The Wayzata makes runner plants in limited quantities, but joins a number of new plants with new roots to the mother plant. This combination of plants appear as one large plant with a number of crowns, which is the reason the Wayzata outbears all other Everbearing Strawberries. Nature provides each crown with a number of fruit-stems and blooms which are formed before winter, remaining dormant until plants are transplanted in spring, which come to bloom shortly after. "In other words you get an extra crop of berries" in spring—then they bear again in late summer and fall. We recommend these large plants for Hill System Culture especially for small plots and gardens, planting them 20 in. by 20 in.

PREMIER *Earliest of all Strawberries*

Westhauser Nurseries,
Sawyer, Mich. Virginia.

Dear Sir: From your 2000 Premier plants I harvested 2400 quarts of No. 1 berries last summer; I did not keep count of the smaller berries. I am going to plant 3 to 5 acres.

MRS. F. L. DAVIS.

EARLIEST OF ALL STRAWBERRIES to ripen, produces heaviest before other varieties have started to ripen in quantities, top prices are therefore assured.

BEAUTIFUL AND FIRM. The berries are uniform, large, firm, glossy bright red, keep their fancy appearance for several days and arrive at long distance markets in an attractive condition; that is one reason Premier has held its popularity for over 15 years and is still going strong.

PROFITABLE, DROUGHT RESISTANT Premier has succeeded in every state of the union and is very dependable. The plants are hardy and long rooted, also drought resistant. Here in our great Michigan fruit belt during the extended drought over the 1936 fruit season Premier held their own and farmers made some real money, many farmers realized \$1000 or better per acre.

Westhauser's Northern Grown Improved PREMIER — Not Drought Stunted

This year of all years, when most acreages of plants all through the middle western states have suffered from drought during the growing season, we are happy that we are in a position to offer the best lot of PREMIER plants we have grown in our nursery history.

REASON—Our PREMIER plants were grown on new land, chuck full of plant food and humus, which holds the moisture; this, together with constant cultivation and hoeing, kept our PREMIERS growing while other fields of plants were actually stunted.

Surplus Strawberry Plants at \$4.00 per 1000

NO DISCOUNT

NOT PREPAID

During our digging season every spring, at the end of each day, there are a few plants of all varieties left. We never carry plants over from one day to another, so that these plants are classed as surplus plants. We offer them to you who do not care to have named varieties, at \$4.00 per 1000. We will not label these plants as to variety, simply calling them surplus plants. They are first class plants, fresh dug and will bear you a fine crop. Do not write asking us to give you named varieties, for if you want named sorts, labeled, they must be bought at catalog prices. These plants will not be sold in less than 1000 lots. Simply send in your order saying Surplus Plants, and how many you want.

"THE BEST PLANTS IN 20 YEARS," WRITES MR. W. I. KELLY OF MISSOURI

"I have been planting Strawberries for the past 20 years, and during that time I have purchased plants from some of the largest and best known nurseries, and must say—you surely use the right slogan when you say—Growers of Quality Plants. The Strawberry plants I bought of you last spring were the largest and most thrifty, well rooted plants I ever saw. I must say your prices are very reasonable. Enclosed find order for Grape plants."

BLAKEMORE (Early)

Originated by the U. S. D. A.—No. 659

Blakemore is a free plant maker and produces a heavy fruiting row on any kind of soil. The foliage is tall and heavy and protects the blooms from late spring freezes. The berries are beautiful glossy, bright red to the core. It has a tough skin, firm flesh and a wonderful mild and juicy flavor. An excellent canner and one of the few varieties that keeps its color after preserving.

We have fruited them for the past five years and find they keep their fancy appearance to the last picking. For test purposes we have left part of a row unpicked for a week in very hot weather and found that very few berries were over-ripe or unfit for shipment at the end of the week. This shows the firmness of this variety and is of particular interest to the commercial grower who often finds weather conditions which prevent regular picking of berries.

BLAKEMORE PRODUCES THE FIRMEST BERRIES of the entire Strawberry family, has replaced other varieties in some southern states and was planted more in states further north during the extremely rainy season last spring. During harvest Blakemore in southern Illinois and Indiana sold for \$1.00 per case more than other varieties as they arrived in good condition in spite of the unfavorable weather. They were shipped as far as St. Paul, Minn., Detroit, Mich., and Milwaukee, Wis.

		1000 for	5.50

Dunlap

Blakemore

DUNLAP THE OLD STANDBY

Midseason

The berries are medium to large, conical and often slightly necked, dark crimson with a deep red flesh, quality very good. The plants are healthy and vigorous. Very productive. Grows on all kinds of soil, and in extremely cold climates. A good variety for canning and a good pollenizer for pistillate varieties. It can be shipped to distant markets. Holds up a long while after being picked. Season a few days after Premier begins bearing.

Prices:

25 for	\$0.40	200 for	\$1.70
50 for60	300 for	2.25
75 for75	400 for	2.60
100 for90	500 for	2.75
		1000 for	5.50

AROMA (Late)

A good late variety and long considered the standard late market Strawberry. It is still grown extensively in all sections of the country, but is especially popular in the southern states, where many fruit growers' associations plant Aroma exclusively. The berries are large, nearly round, and of firm texture, deep red in color and of good flavor, making it ideal for shipping. Although good yields are sometimes produced on light ground, Aroma is at its best on the heavier soils.

Prices:

25 for	\$0.40	200 for	\$1.70

Two Great Early Berries

Westhauser's DORSETT (Early)

A Mighty Newcomer

No other new variety has created such a quick and great demand and popular favor as the Dorsett.

Dorsett ripens with Premier or perhaps a day or two later depending on the type of soil they are grown on.

Foliage is vigorous, healthy, dark green, upstanding and has a very thrifty appearance. 8 to 10 inches tall.

BERRIES ARE LARGE AND FIRM, considerably larger than Premier, very attractive, glistening bright red, firm, and appeal to the buyer of fancy berries. They ripen evenly all over, keep their fresh picked appearance on arrival at long distance markets. The flavor is sub-acid, richly sweet and satisfying. Illustration at left is of an actual photo of Dorsett Berries.

Our plants are grown on new land, are large with an extra heavy root system; they make a good fruiting row on any kind of soil.

A large commercial berry grower who grows the best standard varieties, says—that he considers the Dorsett the most valuable variety he has grown and if he could limit himself to one variety, he would choose Dorsett.

Dorsett Prices

25 for	\$0.40	300 for	\$2.25

Above we present to you a true picture of our heavy rooted, hardy, northern grown, new land Dorsett plants. Just a sample of the sturdy plants we have to offer our customers.

Here we present to you a true picture of our heavy rooted, hardy northern grown, new land Fairfax plants. Just a sample of the sturdy plants we have to offer our customers.

FAIRFAX (Early to Midseason)

The Fairfax ripens 3 to 5 days later than Dorsett, offspring of the same parents as Dorsett.

Fairfax, like Dorsett, makes plants freely; however, the foliage does not grow quite as tall as the Dorsett, the leaves are large, tough and disease resistant, the plants space further apart, similar to Premier.

The berries are fully as large as Dorsett, often 1½ inches through and red to the core, the shape is somewhat irregular, the color is medium to dark red, very shiny and polished appearing, covered with prominent yellow seeds.

The flavor is the best of any spring-bearing Strawberry; we have many letters from customers, who tell us that they get more money for Fairfax in their home stores, the trade calls for Fairfax by name and appreciates their superior quality.

For Larger Orders Write for Quantity Prices

Sensational New Boysenberry described on page 20.

Dear Sir:

The plants I have received from you in the past certainly were fine, the best plants I ever bought. The Fairfax is simply marvelous, brought 15 cents a pint when other varieties were bringing only 10 cents. I have commanded top prices all season.

Everbearer Plant Shortage

The everbearing strawberry plant crop is very limited this year in all sections of the country, on account of the extended drought last summer. The plant crop is estimated at 25 to 30 per cent of a crop. Of course these conditions have some reflection on the price, which is higher, like corn or any other crop where a shortage exists. However, we are in line and are lower in most cases than our competitor, considering quality. It is, therefore, advisable to order as early as possible and make sure of your supply.

MASTODON—1/8 ACRE

Nevis, Minn.
Dear Sirs:—We would like to have you send us your new catalog. We raised some very fine berries from the Mastodon plants we bought of you last spring. 700 quarts from the 1000 plants. We will set out more this spring.
Yours truly,
H. W. HARRIS.

Tacoma, Wash.
Dear Sir:—In reference to the Everbearing Mastodon Strawberry plants I received from you last spring, I feel justified in saying these plants have exceeded any variety in quality, productiveness and flavor. These plants have been fruiting since the first of August and if weather remains mild, I believe we will have strawberries for Christmas.
E. K. OLSON

Sixty to ninety days after they are planted they begin to bear and continue until Frost.

Then next spring they bear a full crop again and a third crop next fall.

Just think of it, 3 crops of delicious large berries in 18 months.

Double and Triple Your Crop— Plant Our Heavy Fruiting Strain

Since the vigor and energy of a plant is stored in the roots and crown, and since these plants have been improved each year by careful selection, such as we practice, you can readily appreciate that you get the best at no extra cost if you order your Mastodon plants from us. We sincerely believe that you cannot buy better plants no matter under what trade name advertised or price you pay, and we are willing to stake our reputation on the above statement.

GEM A Wonderful New Everbearer

We bought our foundation stock direct from the introducer, Mr. Frank Keping, a Central Michigan plant grower, who found this plant amidst his Progressive Everbearing patch.

Westhauser's Gem are grown on new land with all its plant food and mineral elements untouched, therefore, they are **outstanding for vigor and health**, have extra heavy fibrous root system, in fact, their roots are nearly twice the size of ordinary plants.

FOLIAGE. For an Everbearer GEM is a heavy plant-maker and produces a larger fruiting row than any other Everbearer we know of. The plants are very hardy, not subject to leaf blight.

SIZE AND APPEARANCE. The berries are large size, very uniform, and held their size even throughout the dry weather we had last summer. They have the appearance of an over-size Premier berry. The color is a deeper red, very glossy, and they have a very fancy appearance.

FLAVOR. The berries are very sweet and have a flavor like the Progressive variety. The flesh of the berry is very fine grained and red clear through. Very little sugar is necessary to bring out the flavor.

FIRMNESS. The berries are extremely firm and stand long distance shipping well. If you are in the market for an outstanding firm and fancy Everbearer try GEM this year. The supply of course is very limited, as only a few nursery firms are in possession of this great new variety. Play safe, order now.

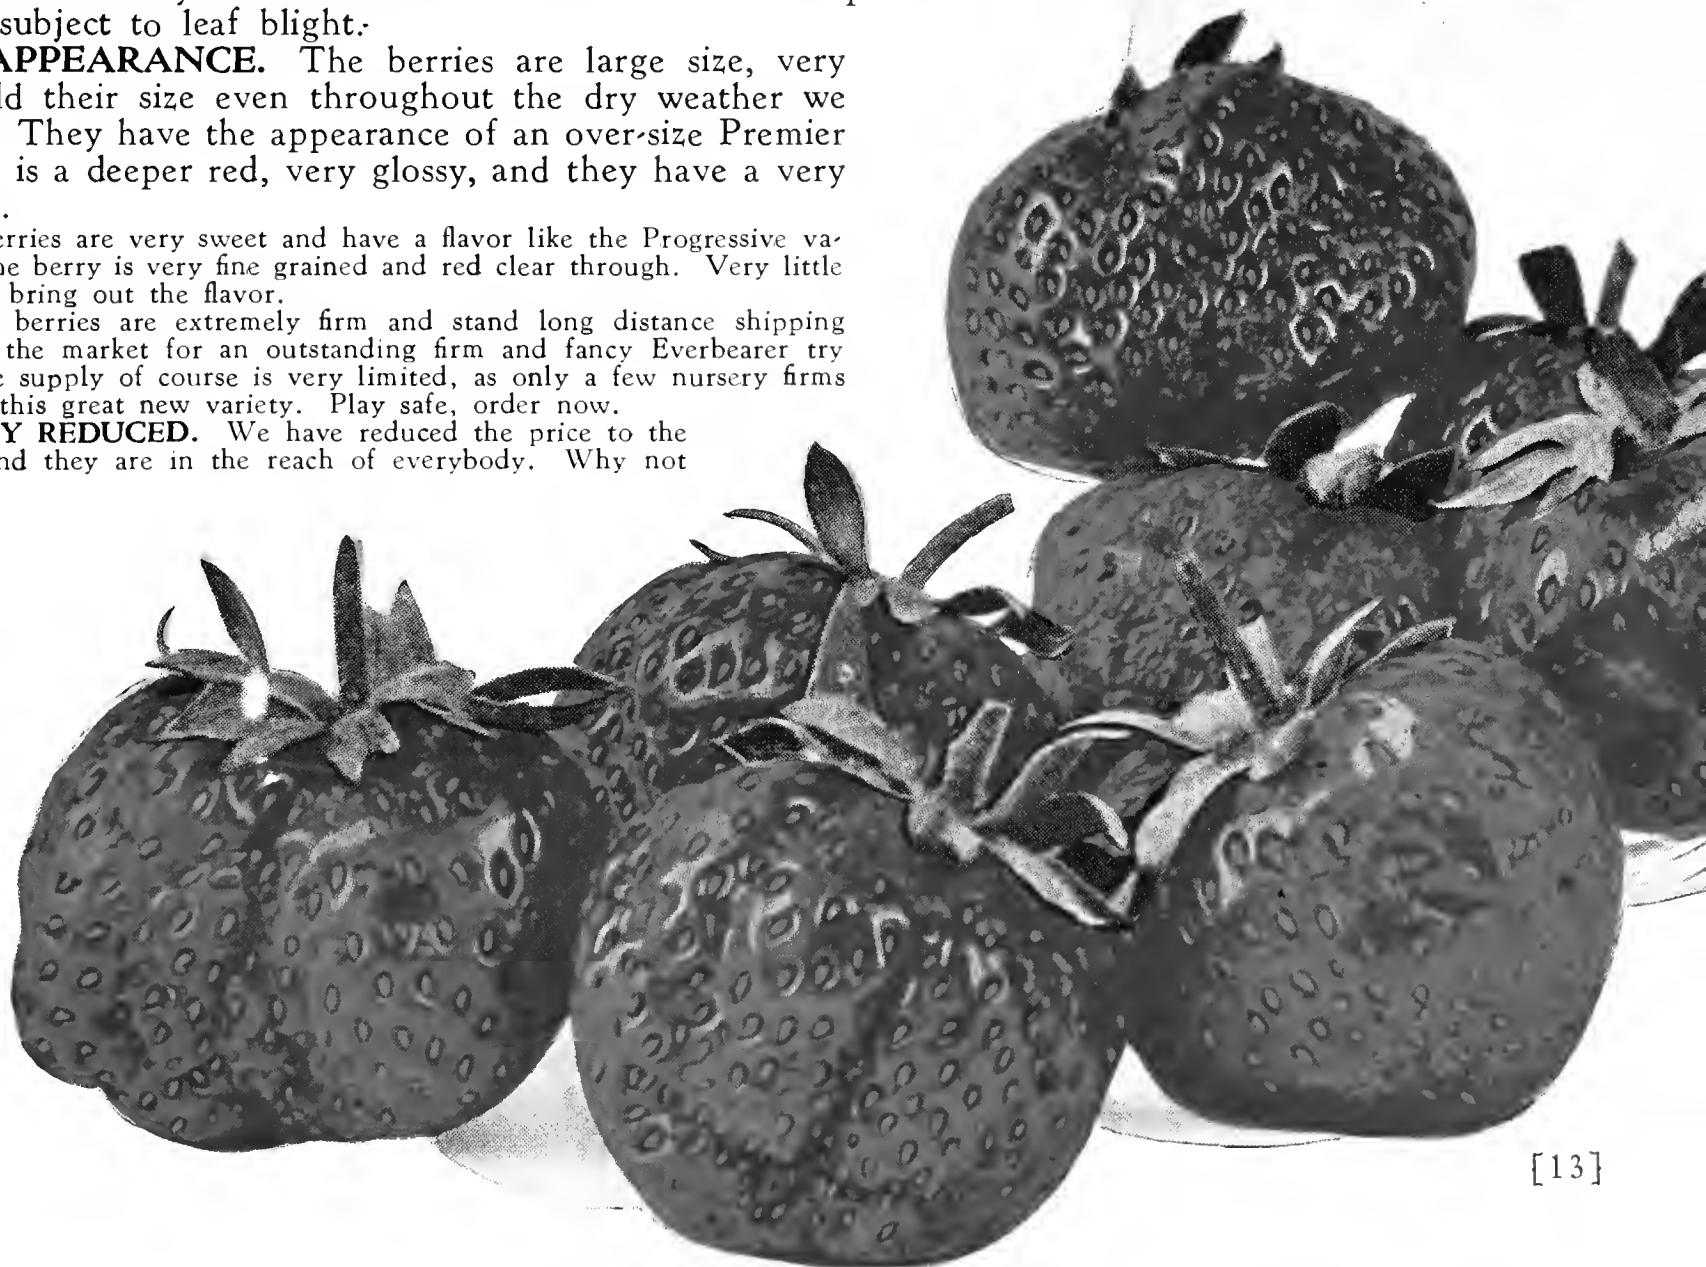

PRICES SHARPLY REDUCED. We have reduced the price to the level of Mastodon and they are in the reach of everybody. Why not try some.

County Fair WINNERS Wisconsin, Sept. 20, 1935.

Westhauser Nurseries,
Dear Sir: You will be glad to know that my Gem Everbearer berries brought first prize at the County Fair. I got the plants of you this spring.
Very truly yours,
MRS. J. C. ALBERS.

Westhauser's RASPBERRIES

TWICE STATE INSPECTED

Chief **Earliest Red Raspberry.** Chief is an offspring of Latham, originated in Northern Minnesota where the temperature goes to 45 degrees below zero. In productiveness it compares favorably with the heavy bearing Latham. The bushes are strong and sturdy, the foliage is healthy, dark green. The berries are large, extra firm, do not crumble, are a beautiful bright red, and of the finest eating and canning qualities. Chief ripens ahead of other Raspberries, when the demand is at its best and top prices are assured. You can make no mistake planting Chief for the early, big money to be followed by Newburgh and Latham for a prolonged season.

Viking **A New Giant Red Raspberry.** A new hardy variety originated at the Ontario Horticultural Experiment Station, Canada. It roots deep, which enables them to mature a large crop of berries even through a very dry season. The berries are easy to pick, are large, lively bright red, thimble-shaped, firm, very attractive and easy to sell. This variety is entitled to a good trial. It may be just the one which does best in your locality. If interested, order early, as we have only a limited amount of plants available.

St. Regis **Everbearing Red Raspberry.** When partaking of some choice, deliciously flavored fruit have you often wished it would last longer? The St. Regis Everbearer is the answer, as it will produce during the regular fruiting season and until late in the fall. It resembles the Early King in flavor and appearance. If you do not have land or time to grow St. Regis for market, be sure to secure a few bushes for home consumption.

Westhauser's Raspberry Plants

Are certified disease-free, having been twice state inspected during the growing season.

Westhauser's CERTIFIED BLACKBERRIES

Eldorado Productive, Firm and Profitable

The choice of the commercial grower and housewife for the good old fashioned jams, pies, preserves and fresh fruit for the table coming just after Raspberry season, when but little other fruit is available. They ripen 10 days after Dewberries and the harvest extends to the forepart of September; they are the last of all spring and summer berries in the season and the trade is willing to pay well for them. The canes grow sturdy and upright, and are hardy enough to need no winter protection.

The berries are large, uniform in size, jet black, and do not turn red after being picked. They have a flavor that always calls for more and are firm enough to ship to distant markets, assuring good prices.

Its hardiness and freedom from disease, especially orange rust, the common enemy of all Blackberries, has made ELDORADO the leading variety with the commercial grower.

Alfred

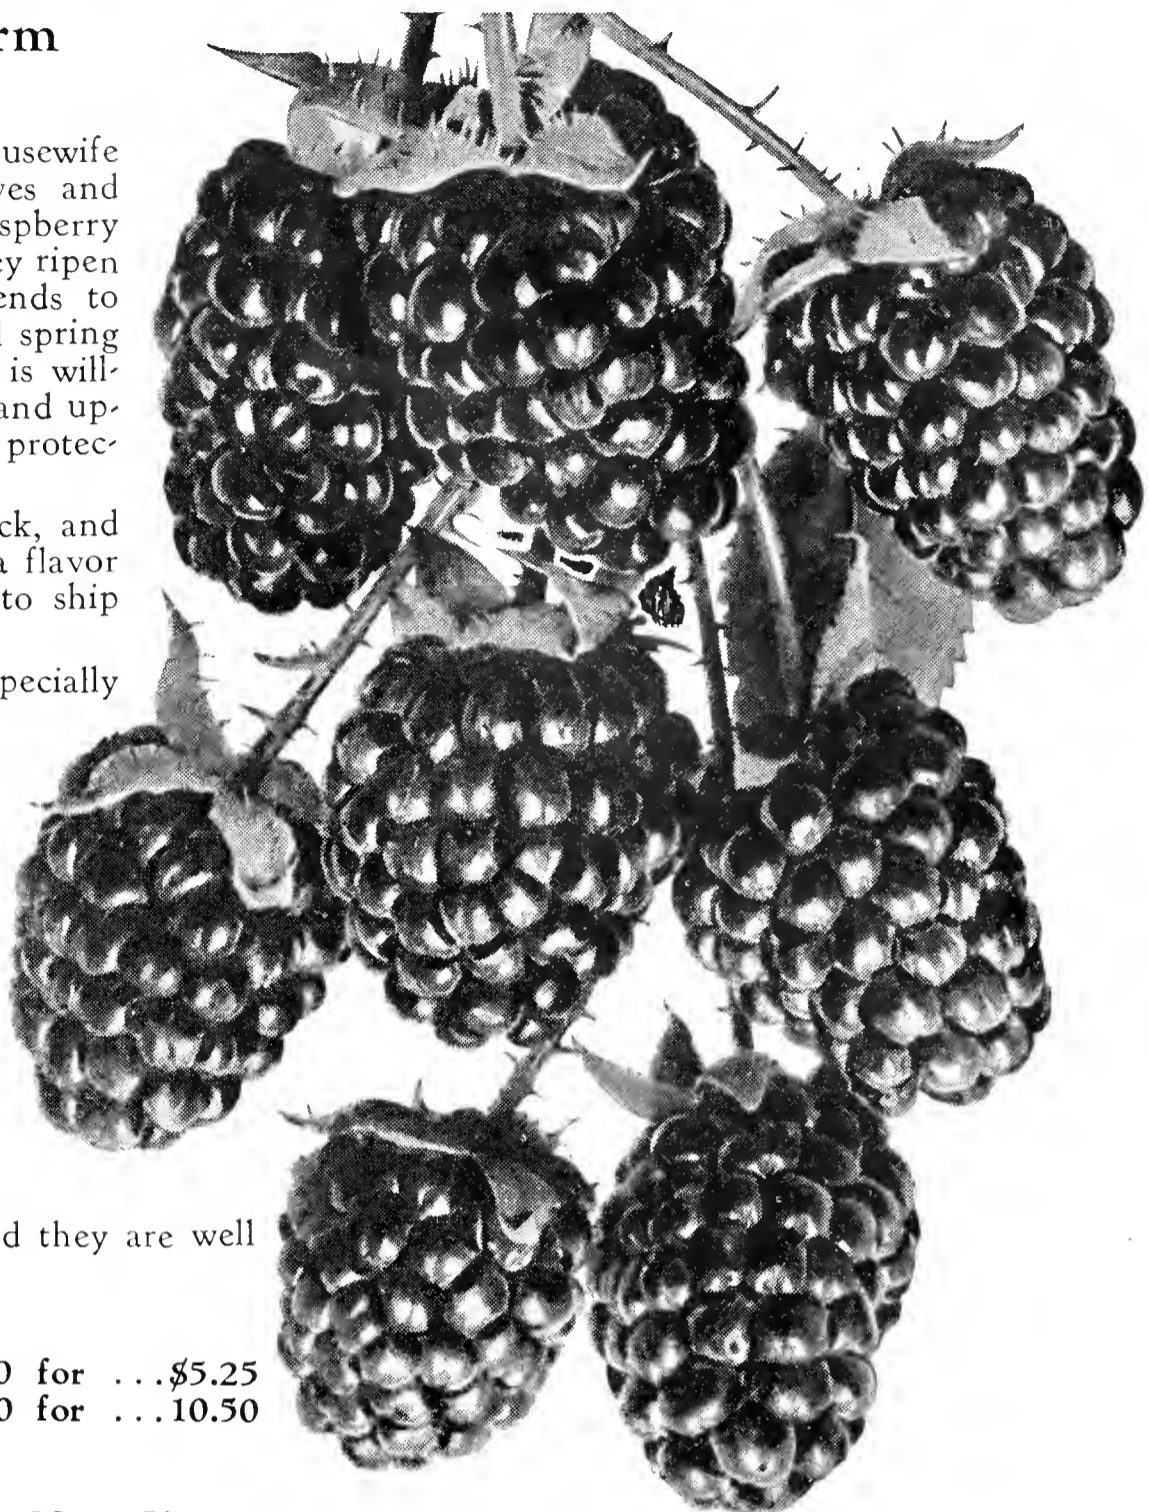

The coreless Blackberry, originated in Michigan, the state that produces fruit with the flavor. The color is a glossy jet black, the flavor sweet and delicious, and it is nearly seedless and coreless. A hardy plant that produces mammoth berries, often one and three-fourths inches long. It does equally well in cold sections. Why not include a few in your order and get started raising this profitable berry?

Eldorado

Gentlemen: Greenwood, Wis.
The Eldorado Blackberry plants I got from you last year produced a large crop of large, beautiful berries. Many thanks for such nice plants.
A. N.

Crystal White Blackberry

Strange as it may seem, this is a real creamy white Blackberry. Mixed with the jet black ones for dessert it makes a most wonderful dish. The fruit is about the size of Alfred with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden.

Westhauser's Heavy Producing Strain "Certified" Raspberries

CUMBERLAND Black Raspberry

The Famous Worth-While Early Blackcap RIPENS a WEEK After Logan

(Midseason) The leader among all Black Raspberries. Popular with growers, as it does well in any climate or any well-drained soil. The large, rich, black berries present such an attractive appearance that buyers pay the top-notch prices for them. Excellent for table use and canning. The Cumberland sets so many berries that it is necessary to give them a severe trimming, as the plants could not hold up if all the berries came to mature size.

On the Benton Harber market, the largest cash fruit market in the world, more Cumberlands were bought than any other Black Raspberry, a fitting testimonial to its high regard by the grower and consumer. In years past we have had to return many late orders with the disappointing words: "Sold out." Moral—Order Early.

Cumberland

The New Red Raspberry

NEWBURGH

A NEW RED RASPBERRY

Introduced by the New York Experiment Station. The plants are heavy and stocky, the canes do not grow quite as tall as some of the other varieties, but carry a large load of berries. In New York state they have yielded 30% more fruit than other varieties; so far Newburgh has proven immune from mosaic, is very hardy and easy to grow.

The berries are larger than other varieties, their size holds up well during their long picking season. The firmness and freedom of crumbling makes Newburgh a good long distance shipper and market variety. The color of the berries is a lighter red than that of Latham, flavor and quality is easily on a par with Latham.

The supply of Newburgh plants is still limited and the demand active, last year we were sold out long before the shipping season was over.

LATHAM Red Raspberry

Latham has made good as the best medium to late variety in all sections of the country. Originated in Minnesota where the severe winters are a test, but it does not winter-kill even at 45 degrees below zero. This is a large, most beautiful and profitable red Raspberry. Rich, dark red berries an inch in diameter are quite common. They stick to the stem days after they are ripe when other varieties would soften and fall to the ground. The fruit is firm, making it good for canning and shipping, as well as for table use. A heavy bearer. In an actual official test the Latham outyielded the older varieties by over 3,000 pints per acre on a three-year planting. The fruit ripens about a week later than the Chief and often covers a fruiting season of about 8 weeks. The demand for Latham always exceeds the supply—so order early.

New Logan Blackcap

The Earliest New Black Raspberry

The best dependable early Black Cap. In some localities where it has been grown for the past few years, Logan has almost displaced other early varieties. Ripens a week to 10 days earlier than Cumberland, which allows the grower to get in on the early market, when prices are high.

Berries are as large as the Cumberland, bears as heavily and ripens a week ahead of Cumberland. This gives the grower a chance to make some real money. One of the New Logan's outstanding characteristics is its resistance to mosaic and other Raspberry diseases. We have a fine lot of thrifty plants to offer.

Prof. J. S. Shoemaker, of the Ohio Experiment Station, has this to say about the New Logan: "If the new Logan does as well elsewhere as it has on the plantation I visited, I would consider it to be the best Black Raspberry introduced since the well known Cumberland. The new Logan seems to possess two outstanding characteristics in particular, both very important ones. First, it seems very highly resistant to virus diseases; second, it begins to ripen a week or so before Cumberland, this giving it a decided advantage for early market."

Youngberry

Illustrated on
Page 17.

This new berry is so much different from any berry that is grown in most parts of the country. It is a cross between the Loganberry and Dewberry. Color of fruit is a rich wine color. Size 1 to 1½ inches. Flavor is pleasant, sweet, with the tartness of the blackberry. Excellent for table use, canning, jellies, pies, and for wine. The plant is a rank grower. Withstands cold and heat. Adapted to a wide range of soils. A great producer. Try them in your locality. They will be the talk of your neighborhood. Plants are still scarce, and a little high in price.

Golden Queen Raspberry

Illustrated on page 17

The most sought-after golden yellow Raspberry as a novelty for home gardens, a delicacy for eating fresh from the bushes and for table use. The size and shape are very similar to the Cuthbert. The canes are hardy, sturdy, upright growing, almost thorn-free; the rich golden yellow berries are very attractive in appearance.

PRICE

Each\$0.15	12 for\$1.25

thracnose, mosaic and other Raspberry diseases. It is proving to be the heaviest yielding of all Raspberries and is adapted either to the red or black Raspberry country, which means either to the North or South. Comparable to Latham Red in size and firmness of fruit. Quality is excellent, making an excellent jelly without the addition of pectin and making a jam supreme. A fruiting row of Cumberland alongside of Potomac showed 10 to 12 berries on a lateral as compared with an average of 20 to 25 berries on a lateral of Potomac. We urge you to make at least a trial planting of this valuable new Purple this season.

Westhauser's LARGE ROOTED, HEAVY-BEARING STRAIN OF Raspberries

Quillen Late Black Raspberry

Will prolong your Raspberry season. Logan, earliest; Cumberland, midseason; Quillen, late. Enjoy the greatest profit.

Quillen berries are immense in size, jet black in color, of the finest quality, and possess a tempting richness of flavor. A truly fancy table berry, and never fails to bring high prices on the market. Every berry develops to full size, and there are no crumbly, seedy berries. Bushes are vigorous growers with stocky canes and heavy foliage. Quillen is especially desirable in localities where anthracnose is common, as it is highly resistant to that disease.

Lucretia

(The Creeping Blackberry). Produced on a trailing vine instead of a bush, does best when supported on a wire, like grapes; free from rust and all fungous diseases. The berries are even larger than blackberries. They are jet black, coreless, sweet and juicy. The Lucretia so far surpasses all other kinds of Dewberries that we have discontinued raising other varieties.

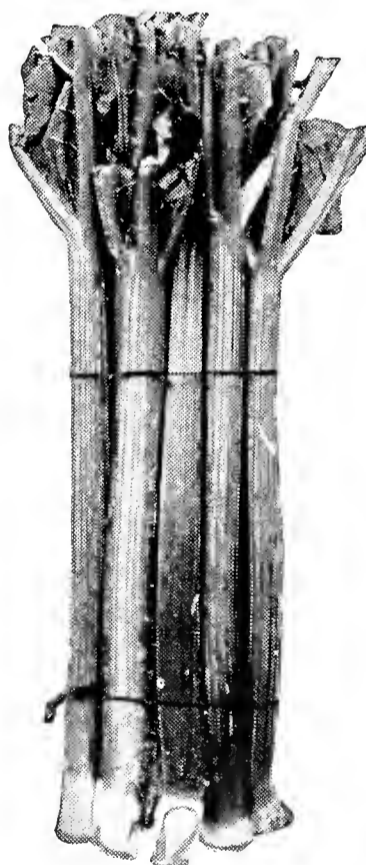

Dewberries are at their best when all sorts of raspberries are on decline, about 10 days before blackberries come on the market and fill a gap for the commercial grower. No home should be without at least a small patch. Our northern grown plants are heavy rooted and reasonably priced.

1-yr. No. 1: 12 for 55c; 25, 90c; 50, \$1.30; 75, \$1.80; 100, \$2.10; 200, \$4.00; 300, \$4.90; 500, \$7.25; 1000, \$14.50.

Lucretia

Rhubarb

Rhubarb MYATT'S LINNAEUS

Rhubarb should be grown in every garden; it provides material for early spring pies and delicious sauce. It is also valuable for canning. Plant a few roots this spring and you will have a supply of early fruit next year. This wonderful new variety is different from the old sorts. The stems are very large and tender; yields very heavily. 1-yr. roots, 10c each; 6 for 40c; 12 for 50c; 25 for \$1.00; 100 for \$3.00; 1000 for \$18.00.

GIANT 1-yr. clumps, main root 1½ inches, with several crowns, will produce a nice crop this year. 25c each; 6 for \$1.25; 10 for \$2.00.

Horseradish

HORSERADISH ROOTS do best in rich, loose soil, set slanting and covered two inches. Crowns, each 10c; 4 for 25c; 12 for \$1.00.

Horseradish

Asparagus

Asparagus

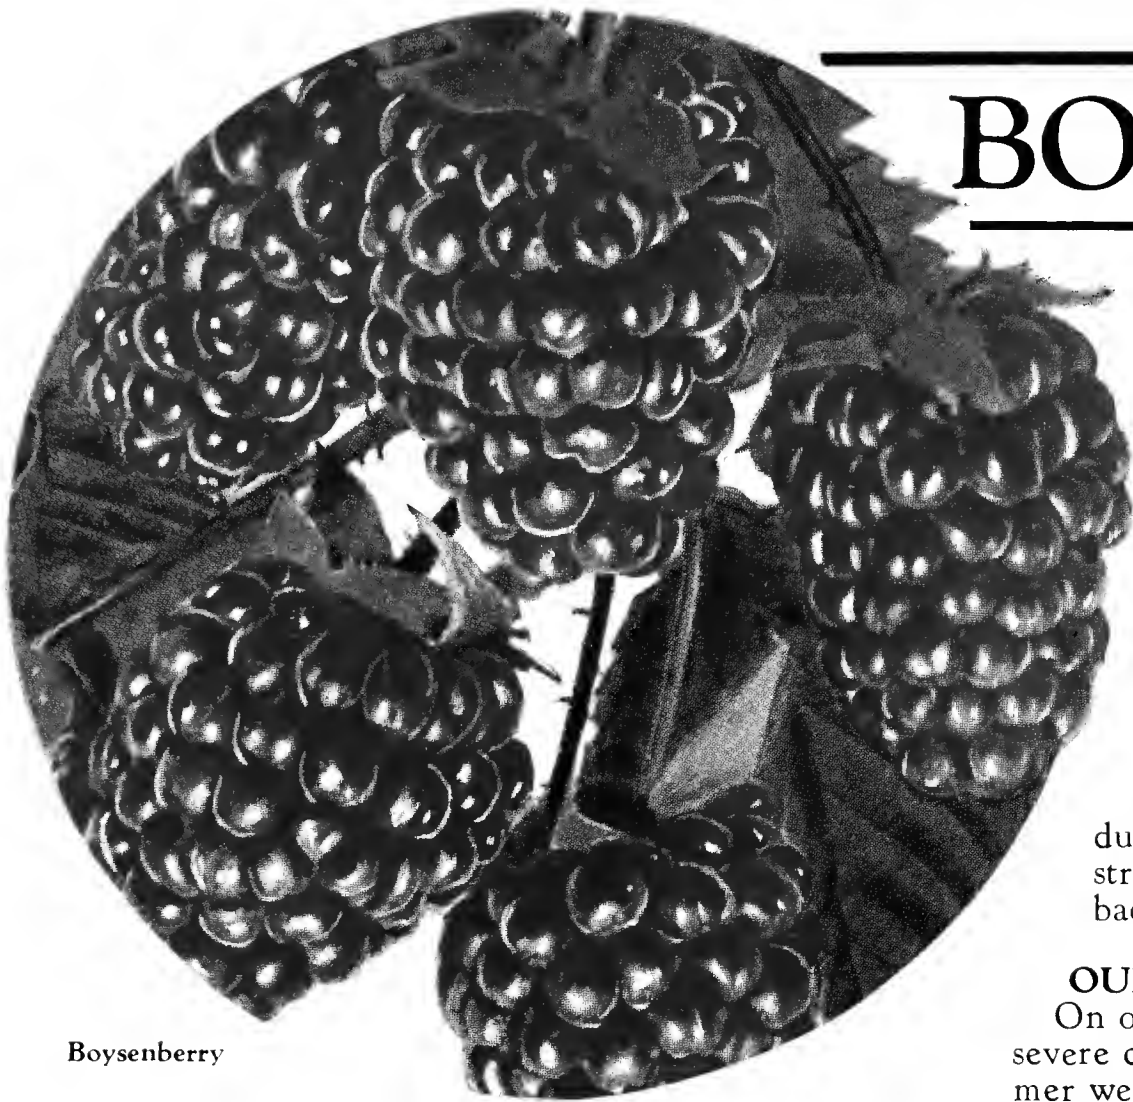

MARTHA WASHINGTON.

This new rust-resisting variety is the result of fourteen years experimenting by the United States Bureau of Plant Industry, and as we believe this to be the best, we, like other nurserymen, have discarded all other kinds. The stalks are large and tender, and very productive. One of the most delicious and earliest vegetables grown, develops quickly and is profitable for market or for home use. With but very little care a patch will last for many years.

1-year—25 for 50c; 50 for 85c; 100 for \$1.50; 500 for \$3.25; 1000 for \$6.50.

2-year—25 for 65c; 50 for \$1.00; 100 for \$2.00; 500 for \$5.00; 1000 for \$10.00.

3-year, Jumbo—25 for \$1.00; 50 for \$1.50; 100 for \$3.00; 500 for \$9.25; 1000 for \$18.50.

Boysenberry

BOYSENBERRY

MAMMOTH 2-INCH BERRIES The Last Word for Size, Beauty, Productiveness and Flavor

For two years editors of Farm and Garden Magazines have written about this new king of all BRAMBLE Berries.

Has produced 11,500 one-pound baskets per acre, which sold for \$1,737.50 on a roadside stand. The berries are 1½ to 2 inches in length, color a beautiful purple, similar to Youngberry, but are more highly flavored and less seedy. The plants were originated in California, but are very hardy, have stood 19 degrees below zero. In the more northern states, the extreme North, we advise laying the vines on the ground during winter, and covering them lightly with straw, leaves or soil just to be safe, tying them back on the wire in early spring.

OUR PLANTS ARE NORTHERN GROWN

On our own farms here in Michigan, and are used to severe cold. In spite of the extended drought last summer we have not lost one plant. Plant them 6 x 6 ft. it will take about 1000 plants for one acre planting.

FOR THE GARDEN

Six to ten plants will supply the average family with these mammoth berries. You will be proud of your Boysenberries, your neighbors will admire them, and you will agree with us, saying, they they are the finest berries you have ever tasted, either fresh, canned, in pies, jams or jellies.

COMMERCIAL GROWERS ATTENTION

The introducer says: BOYSENBERRY will upset the berry market and those who start early with Boysenberry will be the ones who make big money.

The supply is very limited, avoid disappointment, order early. We have also a small amount of 2-year plants—they will bear fruit this year—only 3 plants to a customer.

Black. A new, very early Grape, originated and thoroughly tested by the New York Experiment Station. Ripens with Portland. The bunch and berry are large with excellent flavor. Ripens fully ten days before Moore's Early and is an excellent shipper, as it does not crack. This Grape fills a long-felt need—a juicy, delicious black Grape that ripens early. Vine vigorous and productive. One of the best new varieties. 2-yr., No. 1, extra heavy, 35c each; 3 for 90c; 6 for \$1.85; 12 for \$3.00; 25 for \$6.00; 50 for \$10.00; 100 for \$16.50; 200 for \$32.00. 1-yr., No. 1, 20c each; 3 for 50c; 6 for 90c; 12 for \$1.75; 50 for \$6.00; 100 for \$12.00.

Westhauser's HEAVY ROOTED Grape Plants

—at Wholesale Prices

OUR GRAPE PLANTS are known the country over for a fast growing heavy bearing strain. They will produce delicious fruit, when established, for a long time. Many thousands of our customers are reaping both pleasure and profit from their investments.

Black and White GRAPE Assortment

10 1-year—Concord. (Blue).
8 1-year—Niagara. (White).

\$1.00

No Discount

Concord Is the leading variety for table use, also is supreme for jelly and wine purposes. They grow on all kinds of soil and produce enormous crops of fruit. The bunches are large and compact, the berries are dark blue and very juicy. Many thousand carloads and truckloads are shipped every fall from the great Michigan Fruit Belt. Grape plants are very scarce the country over this year, it will pay you to order early and have your plants reserved. For prices, see page 20.

Niagara (White). This is the leading white Grape grown. Berries are large and fine flavored. Ripens about the same time as Concord. For prices, see page 20.

Moore's Early (Black). Ripens about two weeks earlier than the Concord; large berries and bunches. Excellent for home use and market, and does not winter-kill. For prices, see page 20.

Agawam The bunches are large, shouldered. The berry is of a reddish brown and very tender, with an excellent flavor. Agawam is very vigorous and productive. It is one of the most outstanding Grapes of its class. For prices, see page 20.

Delaware Berries are compactly set, light red, sugary and delicious. A favorite dessert Grape, and among the very best red varieties. For prices, see page 20.

Caco (Red). This new Grape is outstanding for its beauty and quality. Color wine-red, flavor unusually rich, rivals in appearance and flavor Grapes grown under glass. Caco was awarded a medal by the American Institute of New York, a high honor for achievement. 2-yr., extra heavy, 45c each; 3 for \$1.25; 6 for \$2.25; 12 for \$4.00; 25 for \$7.50. 3-yr., 60c each; 3 for \$1.75; 6 for \$3.25.

Westhauser's Hardy Fruit

HARDEE

The Patented Peach No. 120

Illustrated in color on cover page.

What scientists "hail" the most important Peach discovered in the past 25 years. Which has been recognized by the U. S. Government as possessing extra cold resisting qualities. 1933-1934, when the Peach crop amounted to only 30 per cent in the middle western states on account of the sub-zero weather, the most severe winter the Peach growers have ever known, the HARDEE came through with a full crop.

This Peach is large, distinctively new, resembling Elberta in appearance, more richly colored and a little more oblong. This Patented Peach is being handled under license.

PRICES: 4 to 5 ft. trees, each, \$1.40; 10 for \$13.00; 25 for \$27.50; 100 for \$70.00. No discount.

Halehaven Early Peach

(Midseason Yellow Freestone)

This wonderful new Peach was introduced by the Michigan State Experiment station, South Haven, Michigan. It is a cross between South Haven and J. H. Hale. A large, beautifully colored yellow-fleshed Peach ripening about two weeks before Elberta, a perfect freestone, extremely high color, colors a few days before it is ripe on the tree, therefore can be picked reasonably green for long distance shipping.

PRICES: 4 to 5 ft. trees, each, 40c; 10 for \$3.50; 100 for \$28.00.

CHERRIES

Sour Cherries

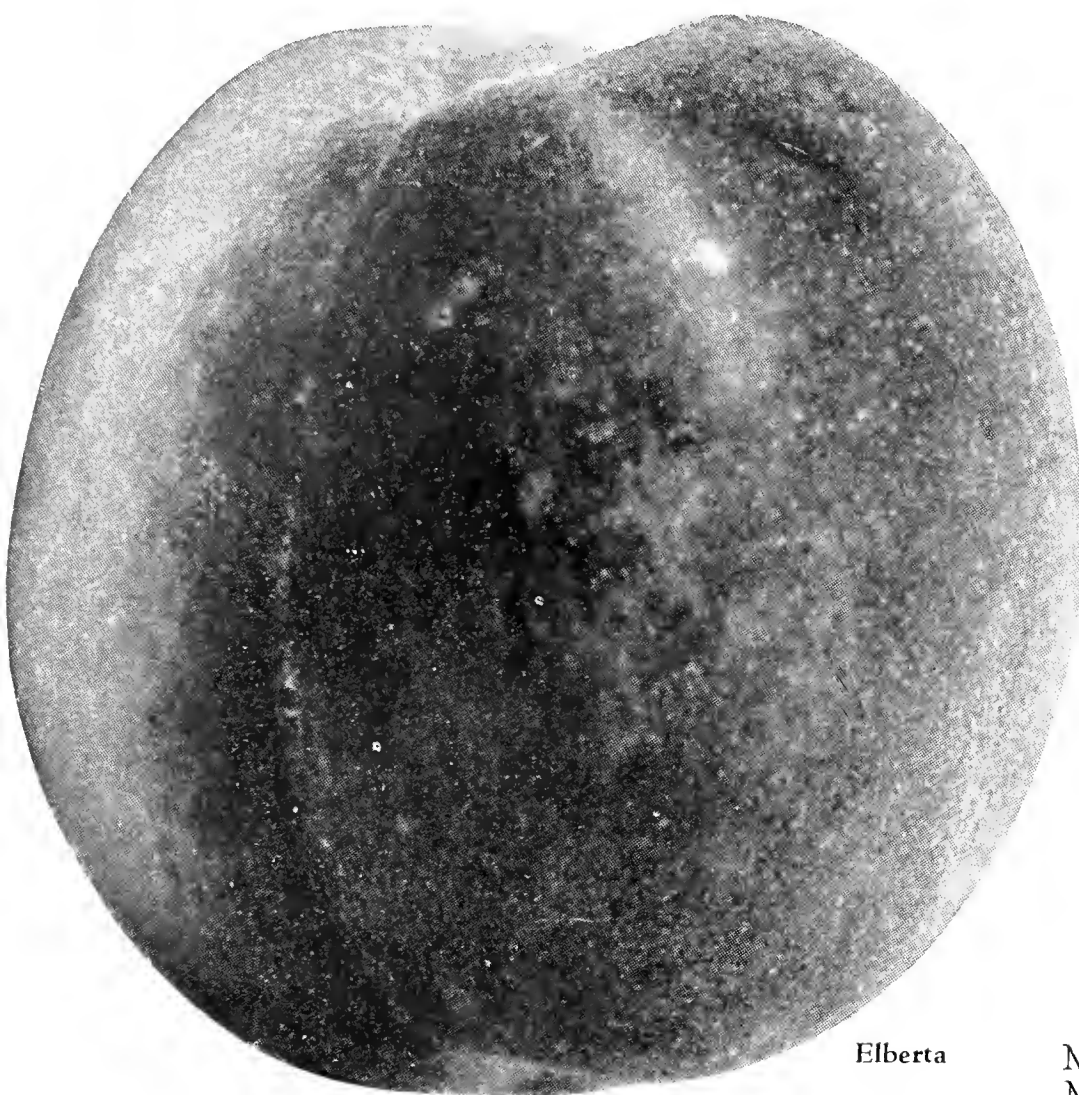

RICHMORENCY. Earliest Cherry to ripen. This is an early ripening Montmorency type only that the fruit ripens a week or more earlier than the standard Montmorency. It ripens at approximately the same time as the Early Richmond. The parent tree is low spreading in growth, produces heavy crops, and the size of the fruit is large. The fact that this strain ripens early is a decided advantage as thousands of Montmorency Cherry trees are mixed with late-ripening factors causing Cherries in otherwise normal trees to be green at picking time. **3½ to 5 ft. trees, each, 50c; 3 for \$1.25; 10 for \$3.50.**

LARGE MONTMORENCY. Best late sour Cherry, ripening about ten days later than Richmond. The fruit is extra large, bright red, firm, and fine for shipping. A strong grower, perfectly hardy, bears young, and a full crop. **3½ to 5 ft. trees, each, 40c; 10 for \$3.00; 100 for \$29.00.**

Sweet Cherries

WINDSOR. A late variety, valuable for market and desirable for home use. Fruit large, dark red. Flesh firm and sweet. Resists rot and clings to tree long. **4 to 5 ft. trees, each, 55c; 10 for \$5.00.**

SCHMIDT. An excellent market Cherry. Fruit is very attractive and keeps well. Deep crimson-red color. A heavy producer of extra large, tender, juicy fruit. **4 to 5 ft. trees, each, 55c; 10 for \$5.00.**

Elberta

J. H. Hale Peach

Ripens a few days earlier than Elberta, is known the country over for its great beauty. The largest Peach grown; light yellow with a deep carmine blush. Finest quality, flavor is outstanding and delicious. The trees are hardy and bear young. For perfect pollenization plant with Elberta.

PRICES: 4 to 5 ft. trees, each, 40c; 10 for \$3.50; 100 for \$28.00.

Elberta

(The Standard of All Peaches)

The outstanding midseason variety by which all mid-season Peaches are judged. Grown over the entire country for both commercial and garden purposes. Very large, yellow with red blush cheek; very juicy, highly flavored. Hardy, vigorous grower, does well in all Peach growing sections. Ripens forepart of September.

PRICES: 4 to 5 ft. trees, each, 35c; 10 for \$3.00; 100 for \$25.00.

Trees for Pleasure and Profit

Illustrated in Full Color on Pages 24-25

APPLES

YELLOW TRANSPARENT. (Early). The very finest extra yellow Apple. It ripens late in July and continues in season until September. Fruit of good size, waxy yellow. Flesh white, mild, juicy and sweet. 3 to 5 ft. trees, each, 50c; 10 for \$4.50.

NEW ANOKA. (Early). Ripens in September. The size, color and flavor of the New Anoka make it a favorite. Also a good keeper. The remarkable feature of this excellent Apple is that it comes into bearing very young, is also dwarf in stature, so that it is well adapted to back yard planting or closer in the orchard. 3 to 5 ft. trees, each, 60c; 10 for \$5.00.

WEALTHY. Ripens late summer and early autumn. Perfectly hardy, vigorous and productive. Fruit large, red streaked with white. Quality good. A profitable market sort. 3 to 5 ft. trees, each, 50c; 10 for \$4.50.

JONATHAN. (Late Fall, Winter). Grand, good winter Apple. Bright, solid red. Flesh white, sometimes tinted with red; firm, fine, crisp and tender. A splendid family sort and highly profitable for market. Tree long-lived, productive and an early bearer. Will keep well without especial care, and also stand much handling. 3 to 5 ft. trees, each, 45c; 10 for \$4.25; 100 for \$35.00.

McINTOSH. Medium in size. Fruit is beautiful red, somewhat striped. Flesh is white, crisp, and highly flavored. The tree is hardy and vigorous, and starts to bear young, and heavy. It is a favorite market and eating Apple. Ripens in September and October. Not a keeper. 3 to 5 ft. trees, each, 45c; 10 for \$4.25; 100 for \$35.00.

DOUBLE RED DELICIOUS. (Fall, Winter). This new Double Red Delicious colors about three weeks earlier than the common Delicious. In August, when the regular Delicious are still green, Double Red Delicious are red all over and are ready to bring fancy prices. We have only a limited amount of these trees to offer. Order early and play safe. 3 to 5 ft. trees, each, 50c; 10 for \$4.50.

YELLOW DELICIOUS. (Fall, Winter). Best yellow Apple. Waxy golden color. Luscious flavor, finest in the world. Bears very early, in second and third year. Keeps until late spring without becoming mealy. Very hardy. You'll make more money with our Yellow Delicious. 3 to 5 ft. trees, each, 55c; 10 for \$5.00.

SNOW APPLE (Fameuse). Medium. Deep crimson; flesh white, very juicy and tender. 3 to 5 ft. trees, each, 55c; 10 for \$5.00.

HYSLOP CRAB. Excellent for preserves and jellies. A heavy, regular producer. Fruit large, red, round and smooth; flesh yellow and sub-acid. 3 to 5 ft. trees, each, 55c; 10 for \$5.00.

QUINCE

ORANGE. We list only this one Quince, as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size. 3½ to 5 ft. trees, each, 60c; 10 for \$5.50.

APRICOT

MOORPARK. Large, roundish oval, pale orange with a faint touch of red on cheek; yellow flesh; ripens first of August. 3 to 4 ft. trees, each, 60c; 10 for \$5.00.

Wealthy

PEARS

BARTLETT. The most popular Pear for home use and market; a leader among canning Pears. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with delicious, musky flavor. Tree vigorous, erect, bears abundantly.

BOSC. Finest quality; extra large, long and tapering; russet; good shipper, brings highest market price. A vigorous grower. October to November. 2-yr. trees, 75c each; 3 for \$2.00.

KIEFFER. (Fall). Large, handsome appearance, rich golden yellow, sometimes tinted red on the sunny side; bears largest, most consistent bumper crops. Wonderful keeper and an astounding long distance shipper. Tree hardy, very strong grower, bears at an early age, producing phenomenal crops.

SECKEL. One of the richest and highest flavored Pears known; always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

PRICES—All Pears except Bosc:
3½ to 5 ft. trees, 55c each; 10 for \$5.00.

PLUMS

YELLOW EGG. Very popular yellow Plum. Rapid grower; hardy, thrifty, prolific bearer. Fruit rich yellow, size medium to large.

GERMAN PRUNE. The most delicious of all Plums. Extra large size, often two inches in diameter. Early and abundant bearer. Combines hardiness, immense size, delicious quality, long keeping, beautiful color, small pit; an early and prolific bearer, often producing a good crop in two years after planting.

LOMBARD. Medium size. Fruit red. Very productive. This is a leading market variety and is grown extensively wherever Plums are known. Late August.

PRICES—All Plums:
3½ to 5 ft. trees, each, 55c; 10 for \$5.00.

Westhauser's Hardy Evergreens

Evergreen Foundation Planting

- 1 IRISH JUNIPER. 12 to 18 in.
- 1 COLORADO BLUE SPRUCE. 10 to 12 in.
- 1 GOLDEN ARBOR-VITAE (Biota). 10-12 in.
- 1 PYRAMIDAL ARBOR-VITAE. 10 to 12 in.
- 1 CHINESE JUNIPER (Mascula). 12 to 18 in.

Price **\$2.25** No
Postpaid Discount

(2 Assortments of the above for \$3.40)

IRISH JUNIPER. An erect, slender, compact evergreen, 1½ feet in diameter, used in cemetery and landscaping. 12 to 15 in., 50c each; 6 for \$2.00. 30 to 36 in., \$2.00 each, balled and burlapped.

GOLDEN GLOBE ARBOR-VITAE (Biota). A very hardy evergreen, compact, grows 4 feet tall. Foliage is light green with a tinge of gold at the ends. This variety is becoming very popular. 10 to 12 in., 35c each.

COLORADO BLUE SPRUCE. Its intense steel blue, glistening foliage makes it desirable for lawn or grouping. Three times transplanted. 10 to 12 inches tall, 75c each; 3 for \$2.00; 10 for \$5.00.

CHINESE JUNIPER (Mascula). Foliage dark bluish green, with a touch of silver. Its habit of growth is upright, very uniform, hardy, will thrive almost anywhere where there is sunlight. Will grow 6 to 7 feet tall. Three times transplanted. 15 to 18 in., 50c each; 3 for \$1.25; 6 for \$2.00.

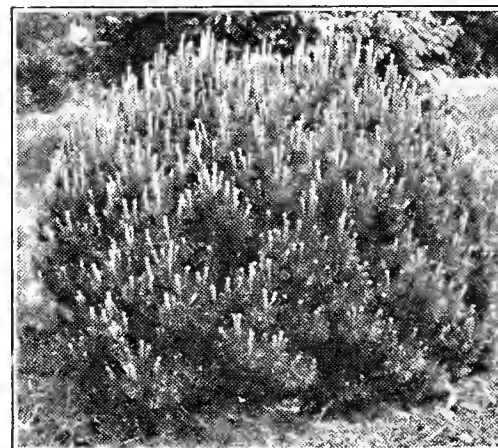

PYRAMIDAL ARBOR-VITAE. Excellent pyramidal evergreen, tapers to a graceful, slender, pyramidal shape. Foliage dark green. Three times transplanted. 10 to 12 in., 40c each; 3 for \$1.00. 15 to 18 in., 75c each.

NORWAY SPRUCE. Deep green foliage, excellent for windbreaks, an ideal Christmas tree. Fast grower. 15 to 18 in., 30c each; 4 for \$1.00; 12 for \$2.50.

MUGHO PINE. True dwarf type, with dense growth. Grows only 4½ to 5 feet in height, but spreads out to 6 to 8 feet in diameter. Color is deep, rich green throughout the year. 2 ft. tall, 18 to 24 in. spread, balled and burlapped, \$2.00 each.

Irish Juniper

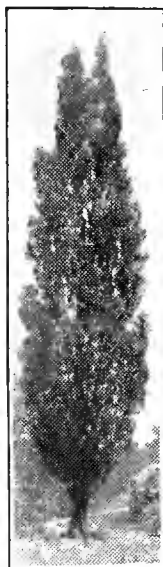

Mugho Pine

Westhauser's Shade Trees

Chinese Elm

Poplar

SUGAR MAPLE (Rock Maple). A well known native tree, having a very symmetrical, dense head. One of the best shade trees for street or park. This variety is also valuable for sugar making and timber. 3 to 4 ft., 25c each; 3 for 60c. 5 to 7 ft., 45c each; 3 for \$1.25; 6 for \$2.00; 12 for \$3.75.

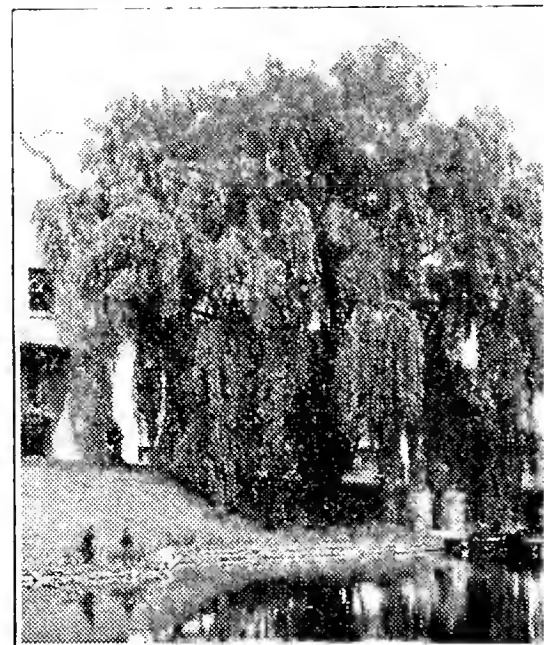

SILVER MAPLE. Rapid growing tree, producing a quick shade, suitable for street or park. The leaves are irregularly indented, bright green above and silver beneath. 4 to 5 ft., 45c each; 3 for \$1.25. 6 to 8 ft., 75c each; 3 for \$2.00; 6 for \$3.50. 12 to 15 ft., \$1.50 each; 6 for \$7.50.

WISCONSIN WEEPING WILLOW. Grows rapidly; has long, fine leaves borne on long, sweeping branches that reach the ground. 5 to 7 ft., 60c each; 3 for \$1.50; 6 for \$2.75.

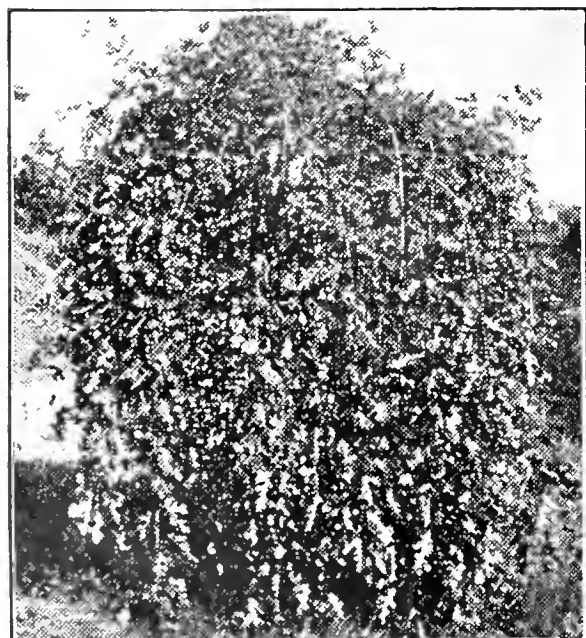

CHINESE ELM. Rapid grower, well rounded head; grows to a tall, spreading tree. Almost any soil suitable. 3 ft. or better, 30c each; 10 for \$2.50. 4 to 6 ft., 50c each; 3 for \$1.25. Fifteen 18-20 in. seedlings for \$1.00.

TEAS' WEEPING MULBERRY. Most graceful hardy weeping tree in existence. Forms an umbrella-shaped head with slender branches drooping to the ground. Edible fruit. Extra heavy specimens, 5 to 6 ft., \$1.60 each.

LOMBARDY POPLAR. Tall and slender tree with bright green leaves and silvery appearance on under side. Suitable for planting along drives and boundary lines; also used for windbreaks and tall screen hedges. 5 to 7 ft., 60c each; 6 for \$3.00.

Westhauser's HARDY SHRUBS

SPIREA VAN HOUTTEI (Bridal Wreath). Long, graceful drooping sprays covered with a mass of white flowers, blooming in early spring. Very hardy. Much used in all sorts of landscape work. Grows to a height of 6 feet. 2-yr., full blooming size, 24 to 30 in., 25c each; 3 for 60c; 6 for \$1.00; 12 for \$1.75.

CORALBERRY (Or Red Snowberry). Medium size shrub, with small pink flowers in the spring and followed by red berries all along the stems, that remain all winter. 2-yr., 20 to 30 in., 30c each; 3 for 75c. 3-yr., heavy blooming size, 30c each; 4 for \$1.00.

Persian Lilac

LILAC, PERSIAN PURPLE. A decided improvement over the common Lilac. A shrub with slender, arching branches, attaining a height of 5 to 10 feet. The foliage is small, the flowers bright purple. Blooms in May and June. A much more profuse bloomer than the common, and does not sprout so much from the the roots. We consider the Persian much preferable for flowers. 2-yr., full blooming size, 30c each; 3 for 75c; 6 for \$1.15; 12 for \$2.25.

HONEYSUCKLE, TARTARIAN. The finest and best known of the bush Honeysuckles. Has somewhat spreading branches, and bright green foliage. The flowers are of bright pink color, followed by red berries which ripen in midsummer and cling to the bush for several months. 3-yr., 3 to 4 ft., full blooming size, 30c each; 4 for \$1.00; 6 for \$1.75; 12 for \$3.00.

FORSYTHIA. Golden yellow, bell-shaped flowers which appear very early in the spring before the leaves come out. One of the very first shrubs to bloom. Grows 6 to 8 feet high. 2-yr., 30c each; 3 for 75c; 6 for \$1.25.

HYDRANGEA A. G. Large, snowball-like clusters of flowers lasting from June to late August. Shrubs attain about 4 feet in height. Very handsome appearance. 2-yr., 2 feet or better, 30c each; 3 for 75c; 6 for \$1.25.

SNOWBALL. Well known; flowers grow in large, ball-like clusters, snow-white; blooms early. 2-yr., 2 to 3 ft., 35c each; 3 for 90c; 3-yr., 2 to 3 ft., 60c each; 3 for \$1.50.

RED-LEAF BARBERRY (Atropurpurea). A brilliant accent shrub as solitary specimen or in a group amidst duller foliage. An exact reproduction of Thunbergi in every respect except color; this variety starting off in its foliage a warm bronzy red; the heat of summer intensifying its red brilliancy; autumn adding other tints to its richness. The abundant scarlet berries persist throughout the winter along the dense network of spiny twigs. A sunny exposure is necessary for color. 3-yr., heavy bushes, 45c each; 3 for \$1.25.

WEIGELA ROSEA. This is a very vigorous grower with spreading, bushy habit, and is covered with fine, rose colored flowers in May and June. The flowers are large, showy and somewhat bell-shaped; leaves quite large and dark green. Very popular. 2-yr., 18 to 24 in., 30c each; 3 for 75c; 6 for \$1.25.

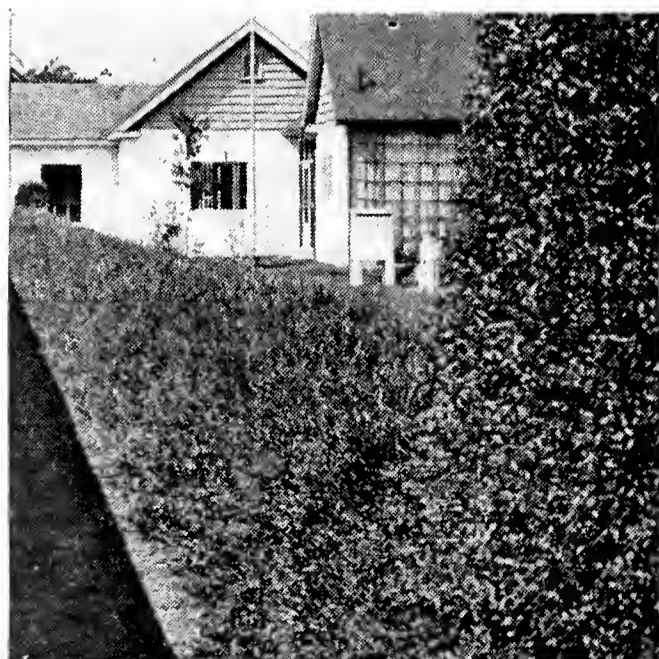

PURPLE WISTERIA. Large clusters of purple, pea-shaped flowers. Compound leaves. Fine for pillars and arbors. Strong, 2-yr. vines, 40c each; 3 for \$1.00. 3-yr., extra heavy vines, 50c each; 3 for \$1.25.

Coralberry

Honeysuckle

Chinese Elm Hedge

Hedge Plants

CHINESE ELM HEDGE. The very finest of all hardy hedges, very fast grower, can be trimmed to any size or height. Plant 12 to 18 inches apart along walks, drives, lot lines, windbreaks or to hide undesirable views. Cut the tops back to 12 inches to cause plants to branch thickly from the bottom. Grows 12 to 15 feet in height.

12 to 18 in. hedging grade, 6, 60c; 12, \$1.00; 25, \$1.65; 50, \$3.00; 100, \$4.50; 1000, \$25.00.
2 to 3 ft., 6, \$1.25; 12, \$1.75; 25, \$3.00; 50, \$5.00; 100, \$9.00; 1000, \$65.00.

AMOR RIVER PRIVET. The hardiest of Privets. For hedges, plant one foot apart. 18 to 24 in., each, 10c; 12, 75c; 100, \$6.00.

CALIFORNIA PRIVET. This variety has long been known as one of the most beautiful hedging plants. It grows rapidly and is free from insects and scale. Leaves are dark, glossy green. Not dependably hardy in some northern sections. 18-24 in., each, 10c; 12, 75c; 100, \$6.00.
2-3 ft., each, 20c; 3, 55c; 12, \$2.00; 100, \$9.00.

MRS. I DE VER WARNER. Color a deep mauve-pink on a stout stem, a good grower and blossoms freely. Measures 10 inches in diameter. **20c each; 6 for \$1.00, postpaid.**

BOB REDFERNSLICK. The color is a soft salmon-rose suffused with old gold, with golden apricot center. The flowers are about 7 to 9 inches through. **20c each; 6 for \$1.00, postpaid.**

PRIDE OF CALIFORNIA. Without a doubt the best of the red decorative Dahlias; vigorous grower and a very fine bloom; large, deep red flowers. **20c each; 6 for \$1.00, postpaid.**

MRS. WILSON. Lilac-lavender, very large, stunning exhibition flower. Do not fail to include this variety in your collection. **20c each; 6 for \$1.00, postpaid.**

AVALON. Chrome-yellow. Stem equal to Jersey's Beauty. Flower ideal in every way, 8 to 10 inches through. Do not fail to include this marvelous yellow in your collection. **20c each; 6 for \$1.00, postpaid.**

BASHFUL GIANT. A large Dahlia in red and yellow; belongs in any first-class collection. **20c each; 6 for \$1.00, postpaid.**

SAGAMORE. Light copper or golden amber shaded orange-buff. **20c each; 6 for \$1.00, postpaid.**

MRS. LARVEKA. New, enormous flowers. Golden yellow. **20c each; 6 for \$1.00, postpaid.**

Improved Napoleon III

Dark Crimson-Red Everblooming Carnation
(Picture in color on page 28).

One of the best, and in my opinion the best double everblooming hardy Carnation ever put on the market. It is a strong, sturdy grower, stands lots of abuse, with ordinary care blooms five months from June to November. One of the few plants that will stand the usual lack of care given in cemeteries. Beautiful, red, spicy fragrance. **Prices: 3 for 75c; 6 for \$1.10; 12 for \$1.75, postpaid.**

Chinese Magnolia

(*Magnolia Soulangeana*)
(Picture in color on page 29).

Let's change "Magnolia" to "Magnificent" for no name could be better suited to this glorious tree. Truly Magnolia is the aristocrat of all flowering ornamentals.

Produces immense flowers in the spring before leaves appear. Leaves large and glossy. A highly ornate specimen at all times of year. Grows 18 to 20 feet tall. Admirers will come by your home just to see this amazing beauty. 2-year, branched, field-grown stock. **\$1.50 each; 2 for \$2.50; 6 for \$6.00, postpaid.**

Egyptian 'Mum

Very Hardy Perennial

Similar to Pink Cushion and Azaleamum. Stronger grower and richer in color, blooms first year planted from July to late in fall, dainty rose-like buds opening to soft pink flowers, rapid grower, grows from a small plant to a mound the size of a bushel basket in one year with from 500 to a thousand blossoms on each plant, a gorgeous flower bed by itself, or if you are looking for a dainty beautiful border for your flower bed plant Egyptian 'Mum. **1 for 30c; 2 for 50c; 5 for \$1.00; 12 for \$2.00, postpaid.**

Chrysanthemum, Gipsy Girl

A beautiful 'Mum, color crimson shades to chestnut. Flower 2 inches across, blooms from September to late November. **25c each; 6 for \$1.00; 10 for \$1.40, pre-paid.**

Chrysanthemum, Glory of Seven Oaks

Bears large flowers in clusters 2 inches across, color a soft, golden yellow, an outstanding beauty. **25c each, 6 for \$1.00; 10 for \$1.40, postpaid.**

Spirea Anthony Waterer

Bright crimson flowers blooming at the end of June, and if flowers are removed when they fade will bloom until frost. Dwarf grower; not over 3 feet at maturity. **3-yr., 24 to 30 in., each, 50c; 3 for \$1.25.**

Flowering Almond

Covered with small, rose-like, pink flowers before the leaves come in the spring. Blooms very early. Attains a height of 6 to 8 feet. **2-yr., 24 to 30 in., each, 50c; 3 for \$1.25.**

Tree Hydrangea, P. G.

Handsome, strong 3-4 ft. trees. Blooms from July to September the first year. Star attraction in any landscape. Starts with a white bloom which turns to pink. **\$1.00 each; 3 for \$2.50, postpaid.**

Cultivated BLUEBERRY

(Illustrated in Color on Back Cover)

OR HUCKLEBERRY

Correct Planting Booklet

Forty-eight pages of valuable information on planting, pruning and general care of plants, shrubs, trees, etc. Everyone interested in plants should have this book. Supply limited.

PRICE 25c
If Included
With Order— **15c**

Profitable — Beautiful

Not only does the cultivated blueberry or huckleberry produce very juicy and delicious fruit in clusters which are very easy to pick, 2 to 3 times as large as the wild blueberry, but they are very ornamental bushes and can be pruned to the desired height. The foliage is long and narrow, deep green with pinkish white blooms in the spring.

For best results the Blueberry should be planted on acid soil, when that kind of soil is not available, we advise to make an opening 15 to 18 inches deep, fill in with acid soil to give the plants a good start adding plenty of water.

We are listing only 2-year transplants, well-branched, and under favorable conditions they will produce a few berries this year, but will produce a crop of berries the year after they are planted.

Blueberry 2-year transplants. Extra heavy fancy, \$1.00 each; 3 for \$2.75; 6 for \$5.00; 12 for \$9.00.

Blueberry 2-year Transplants. No. 1. 3 for \$2.00; 6 for \$3.75, 12 for \$6.75; 25 for \$12.00; 100 for \$45.00. For larger orders write for special prices.
